

Marital Relationships and the Implications of Service Provision and Social Policies

Sandra Rupnarain

Talking Points

- Couples relationship, dynamics and interactions in the context of pre-migration, post migration and settlement.
- Bridging existing evidenced knowledge on healthy marital relationships with a culturally and spiritually informed lens established in equity and not equality.
- Defining a collectivist-individualistic approach that is inclusive of the macro, micro meso levels of the couples experiences and interactions.
- Using a trauma informed approach in assessment and conversations.
